Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 2, 6-23 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Shioiri '828.

Fig. 7 shows two images of an eye fundus superimposed. The superimposed image is color processed for comparing changes to the two images. See the discussion col. 4, line 62 to col. 5, line 39.

Regarding claim 20, Shioiri discloses numerals 28a and 29a as denoting an optic nerve papilla portion.

Regarding claims 9, 15 and 22, Shioiri teaches the eye fundus images 28 and 29 may be displayed in image monitor 26 by switching alternately.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shioiri '828 in view of Chekerylla '598.

Shioiri shows all of the claimed features except for deforming the digital images or warping the images.

Chekerylla teaches modifying digital images by using a warping or deforming process to better display the human form.

One of ordinary skill in the art would have found it obvious to combine the warping or deforming teaching of Chekerylla for the digital images obtained in the Shioiri device because it is known the eye of a patient has the tendency to move and the warping taught by Chekerylla compensates for such small amounts of patient motion.
